## **Background**

On February 23, 2001, the first half of regulatory language became effective in regards to the Commission's data collection regulations. This Committee workshop is the “kickoff” for the second half of the Commission’s data collection rulemaking.

Several years ago, the Commission recognized that the changes in industry structure required reexamining its data regulations. In the summer of 1997, the Commission initiated an investigation that involved participants from electric and natural gas markets. Following numerous and extensive public discussions, the Commission published its *Report on Generator & Consumer Data Reporting Requirements* (Commission publication number P300-99-007, hereafter *Data Report*.) The *Data Report* is available on the Commission website at

<[http://www.energy.ca.gov/reports/1999-12-17\\_300-99-007.PDF](http://www.energy.ca.gov/reports/1999-12-17_300-99-007.PDF)> or by contacting Andrea Gough, phone (916) 654-4928, fax (916) 654-4910 or e-mail [agough@energy.state.ca.us](mailto:agough@energy.state.ca.us).

The *Data Report* provides the basic framework for the specific changes in data collection and reporting requirements set forth in the proposed regulations. To implement the regulations, the Commission divided its rulemaking into two parts. The first part was completed in February 2001, when a substantially revised Article 1 and associated confidentiality amendments were filed with the California Secretary of State. The second part of the rulemaking begins with this workshop that allows interested parties to participate in finalizing the express terms that contain the proposed language for the second half of the Commission's data collection rulemaking.
